

Rommelag is a 50 year old German company that is the leader in aseptic Blow/Fill/Seal filling technology. This technology is used primarily in the production of aseptic pharmaceutical products. These products include unit-dose eye drops, nebulized inhalation drugs, injectable drugs and IV solutions. Rommelag is currently looking to expand its home base service group in North America. The job requires extensive travel. Work will be performed at the machine factory in Germany and the customer's production site.
